

Gas Barrier Membranes

Novia Gas Barrier membranes are suitable for protecting constructions from the ingress of potentially harmful gases such as radon, carbon dioxide and methane.

Novia Methane Pro Gas Barrier – 1.6m x 50m

A premium specification multi-layer laminate DPM membrane incorporating reinforcement and an aluminium foil core. This membrane has passed both sheet and joint testing to ISO 15105-1 and fully meets the requirements of BS 8485.

Novia 1200 Gauge Radon DPM - 4m x 25m

Novia Radon Barrier is an approved blown polythene material suitable for use as a radon barrier damp proof membrane in solid concrete ground floors that are not subject to hydrostatic pressure.

Installation Tapes

Novia butyl and lap tapes should be used to ensure a complete gas seal is maintained throughout the entire life of the product. It is very important that the product is not damaged during installation, and that all breaks or damage to the membrane, intentional or otherwise, are fully sealed.

Always ensure all products are installed correctly using suitable tapes. For full details on individual products or for more construction membrane assistance, contact our sales team on 01622 678952 or visit us at
