

# Novia® Tapes & Sealants

As market leaders in air tightness membranes, breather membranes, and vapour control layers, the Novia range of jointing and sealing tapes can help ensure durability and efficiency with every installation.

## **Novia® Double Sided Butyl Tape**

A high performance polyisobutylene (PIB) based sealing tape. This material can be used in a wide range of applications where products or installations need to be sealed against air and water ingress, particularly Air and Vapour Control Layers (AVCL). Novia® Double-Sided Butyl Tape is non-toxic and requires no tools to apply.

**Use with:** Vapour Control Layers, Gas Barriers and Shed Linings

**Sizes:** 50mm x 10m, 30mm x 30m, 15mm x 22.5m

## **Novia® AirSeal 310 Sealant**

A high tack sealing compound manufactured from a solvent free polyacrylic emulsion. It can be used for internal airtightness sealing applications as an Air and Vapour Control Layer and Damp-Proof Membrane installation product to supplement the use of Novia® installation tapes.

**Use with:** Vapour Control Layers, Gas Barriers and Temporary Protection

**Sizes:** 310ml Cartridge

## **Novia® Breather Membrane Lap Tape**

A sealing and bonding tape suitable for sealing laps on external breather membranes within both roof and wall applications. To comply with pitched roof BS 5534 wind uplift zone requirements, you must use Novia® Breather Membrane Lap Tape. See wind uplift tables on our breather membrane datasheets for full details. Novia® Breather Membrane Lap Tape is normally used in conjunction with Novia® Double-Sided Adhesive Tape for a fully sealed and airtight membrane installation in wall and roof applications.

**Use with:** Breather Membranes

**Sizes:** 50mm x 25m, 75mm x 25m

## **Novia® Metalised BOPP Tape**

A high strength, high tack, reflective tape for use as a lap seal in vapour control and damp proofing applications. Novia® BOPP tape adds a final barrier to improve air tightness. This should be used in conjunction with Novia® Double Sided Butyl Tape, which is used for the overlap seals.

**Use with:** Vapour Control Layers, Gas Barriers and Temporary Protection

**Sizes:** 50m x 60mm

Double Sided Butyl Tape

For more information on tapes please see the individual product datasheets.

## **Novia® Double Sided Adhesive Tape**

Used for the lap sealing of breathable or temporary protection membranes. The tape has aggressive adhesion, high tack, and good cohesion. Novia® Double-Sided Adhesive Tape is normally used in conjunction with Novia® Breather Membrane Lap Tape for a fully sealed and airtight membrane installation in wall and roof applications.

**Use with:** Breather Membranes, Temporary Protection

**Sizes:** 50m x 50mm

Always ensure all products are installed correctly using suitable tapes. For full details on individual products or for more construction membrane assistance, contact our sales team on 01622 678952 or visit us at
