

NOVIA

Grade 509B Reinforced KU Liner

Product Overview

As the need for additional space within the home for storage, work or leisure purposes continues to increase, gardens are very often providing a quick and cost-effective solution to people's problems. Garden structures that our 509B membrane is suitable for include:

- Sheds
- Log cabins
- Home offices
- Playhouses
- Summer houses
- Stables
- Workshops
- Storage

509B adds extra protection to a garden structure by creating a windproof and waterproof outer layer. It is an ideal option for uninsulated garden structure manufacturers or even home owners renovating a current uninsulated garden building.

Product Specification

509B is a fully reinforced high specification bitumen bonded kraft paper laminate. The main specification for this product is based on BS 1521, but for shed linings it is produced with a non-compliant selvedge, or uncut edge finish.

Material weight..... 200 gsm
Size available..... 1800 mm x 50 m
