

Breather Membrane Lap Tape

Novia Breather Membrane Lap Tape is a sealing and bonding tape suitable for sealing laps on **Novia Breather Membranes** within both roof and wall applications. It should be used in conjunction with **Novia Double-Sided Adhesive Lap Tape** for a fully sealed and airtight membrane installation.

Manufactured with high strength acrylic dispersion adhesive, and using non-woven polypropylene as the carrier, Novia Breather Membrane Lap Tape is the perfect tape to use with installation of Novia Breather Membranes. This will help to ensure an airtight seal of the external building envelope helping to keep heat in, while allowing moisture to leave the building.

This tape is required for use with some breather membranes in accordance with BS 5534 wind uplift requirements. Please see individual breather membrane technical datasheet for guidance and geographical data.

General information

Roll size	50 mm x 25 m
Release paper	Brown silicone paper
Carrier	Polypropylene non-woven
Adhesive	Acrylic dispersion
Shelf Life	12 months, stored in original packing at 21°C and 50% relative humidity

Nominal technical data*

	Value	Units	Test Method
Weight	0.55	kg	
Elongation	≥ 50 (40%)	N/25mm	EN 14410
Thickness	0.55 – 0.6	mm	EN 1942
Peel adhesion	≥30	N/25mm	EN 1939
Processing temperature	From -10. Recommended +5	°C	
Temperature resistance	-30 to +100	°C	

*All data based on average values
