

# NOVIA

## Grade KU120 Shed Liner

### Product Overview

As the need for additional space within the home for storage, work or leisure purposes continues to increase, gardens are very often providing a quick and cost-effective solution to people's problems. Garden structures that our KU120 membrane is suitable for include:

- Sheds
- Log cabins
- Home offices
- Playhouses
- Summer houses
- Stables
- Workshops
- Storage

KU120 adds extra protection to a garden structure by creating a windproof and waterproof outer layer. It is an ideal option for uninsulated garden structure manufacturers or even home owners renovating a current uninsulated garden building.

### Product Specification

KU120 is a traditional, low cost non-reinforced bitumen bonded kraft paper laminate, with a selvedge, or uncut edge finish.

Weight.....120 gsm
