

Novia® Double-Sided Adhesive Tape is a double sided tape which bonds exceptionally well with a special adhesive system. It has a polyester scrim carrier and acrylic dispersion adhesive on a silicone coated brown release paper.

Novia® Double-Sided Adhesive Tape is suitable for use with **Novia® Breather Membranes** and should be used to seal all membrane overlaps to protect against external environmental conditions and improve airtightness.

To fully complete a breather membrane seal and further reduce the air-leakage of the construction, use this tape in conjunction with **Novia® Breather Membrane Lap Tape**.

Example installation

Nominal Technical Data *

	Value	Units	Test Method
Roll Width	50	mm	
Roll Length	50	m	
Roll Weight	0.85	kg	
Thickness (without liner)	0.22-0.24	mm	DIN EN 1942
Shear Adhesion	500	g/625mm ²	DIN EN 1943
Peel Adhesion	≥30	N/25mm	DIN EN 1939 **
Installation Temperature	From -10	°C	Recommended +5
Temperature Resistance	-30 to + 100	°C
